

Candidate Statement and Biography

Brittini Lorton

Being a part of the MAA Rocky Mountain section has been a great pleasure over the years. I have learned and grown the most working within this section and being among such excellent colleagues. I have served on multiple MAA award committees over the years, and have loved reading about the wonderful work that my colleagues across this section have been doing. It has inspired my own work and renewed my passion for mathematics and mathematics education. I see the Rocky Mountain Section as a great opportunity for continued and improved collaboration among colleagues. I would love the opportunity to serve as Vice-Chair for this section and I am grateful for your consideration.

Biography. I have been teaching at the Community College of Denver for 12 years and have loved dedicating my time to both the study and teaching of mathematics. Over my career, I have engaged in multiple educational initiatives, most notably the development and implementation of Open Education Resources (OER) for the majority of our math courses here at CCD. Over the last few years I have been maintaining the OER resources for many of our courses and regularly updating, improving, and sharing our content. I have also served in multiple leadership roles such as a Math Discipline Chair for the Colorado Community College System, Math Club Faculty Advisor, and Curriculum Committee Chair.
